RONI DEY   FRONT-END DEVELOPER

Seeking an entry-level opportunity with an esteemed organization where I can utilize my skills and enhance learning in the field of work. Capable of mastering new technologies.

Phone: 7217759821
Email: ronidey400@gmail.com
Github: https://github.com/Ronidey

TECHNICAL SKILLS

- HTML, CSS, Bootstrap, JavaScript, jQuery, React JS
- Node JS (Express JS), MongoDB (Mongoose)
- Webpack, Sass, Git, Github, Figma

PROJECTS

- **Online Shopping**

  The technologies i used in this project are: React JS, CSS, Express JS and Mongoose. My main focus in this project was on react, here i used modern react features like hooks, lazy loading and for the state management i used useReducer and useContext instead of redux. While working on this project i learned a lot about how to handle client side routing using react.

  Here I decided to go with token based authentication but i'm not sending the token with the response body but as an httpOnly cookie because it's safer and since i'm hosting my frontend on the same server, it works just fine. Here is the link: https://roni-online-shopping.herokuapp.com/

- **Forkify**

  It's a single page food recipe web app where user could search recipes, view them, add them to their wishlist and more. This project was built using Vanilla JavaScript, it was the final project of one of my udemy courses. While building this project I learned lot of things like state management, MVC architecture, handling request response on the client side and more. Here is the project link https://zen-ritchie-6d120b.netlify.app/#35477

- **My Portfolio Site**

  It's a single page website, the reason I'm adding it to the list is because it contains all the other cool projects I've built so far. Here is the link https://github.com/Ronidey/Ronidey.github.io

EDUCATION

- BA Honours in Political Science from Delhi University in 2018 with CGPA: 6.3 / 10
- 12th from Govt. Boys Senior Secondary School in 2015 with 81.4%
- 10th from Govt. Boys Senior Secondary School in 2013 with CGPA: 8.4 / 10

Udemy Courses

- Node.js, Express, MongoDB & More: The Complete Bootcamp 2020 by Jonas Schmedtmann
- React for the rest of us by Brad Schiff
- The complete JavaScript course 2019: From Zero to Expert by Jonas Schmedtmann
